

*Asco Numatics S.p.a., Sirai Elettromeccanica S.r.l. and Sotrac S.r.l. Are delighted to inform you that they have merged together into a single company called **ASCO NUMATICS SIRAI S.r.l.** from last 1 June 2010.*

*The reason behind this decision was due to the fact that all the companies belonged to the multinational Group EMERSON and they had been collaborating with each other over the last few years, enabling important objectives to be achieved even in the midst of such a difficult period for the world economy.*

*Our registered office will continue to be in Bussero (MI) and our contact details will remain unchanged.*

*Each of the companies will bring with it its own products, knowledge and experience. Existing brands will remain separate, as will the range of products; in this way you will be able to have a valuable alternative to choose from, with the further advantage of always being able to turn to one single, serious company. Your contact persons will not change: you will continue to work with the same contacts as you have done in the past, in the same manner and with the same professionalism which you are used to.*

*The sales network will also benefit, becoming even more extensive and therefore more able to meet your requirements.*

*We have ensured all our employees that they will still be able to work regularly and in a competent manner.*

*We will guarantee that our clients both present and future receive an even more reliable and personalised service, with the care and attention we give to only the best of businesses.*
